

GLASS DOOR GUIDE

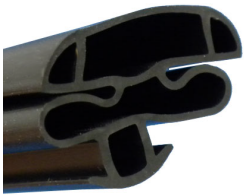

Most of the refrigerated display case glass doors are manufactured by Anthony, Ardco, DisplayRite, or CDS. If you are having difficulty identifying the profile (or shape) of your gasket check to see if the manufacturer of your door is Anthony or one of its subsidiaries. Anthony doors contain a WO # or BM #. This number will be most likely located on the top frame of the door. You will also need the door size which is located in the same place.

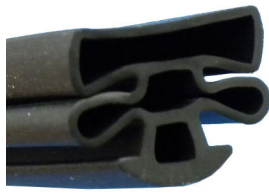

Give us a call at 800.695.7929 or E-mail us info@bayarearefrigeration.com with this information and we can identify your gasket or any other hardware you may need.

If you do not have an Anthony, DisplayRite, Ardco, or CDS door you can try to identify your gasket by checking out our gasket identifier chart under customer resource center. If you are still having difficulty identifying your gasket you can E-mail us photos of your gasket and your contact information to info@bayarearefrigeration.com.
